CHOCO DEPARTMENT, COLOMBIA
Compania Minera Choco Pacifico (Choco Pacific) produced 1.5 million ounces of gold and 1.0 ounces of platinum from the Choco district between 1906 to 1990, largely limited to an average depth of 8m or less.

Choco Pacific historic reports indicate the underlying hard rock conglomerates are anomalous to gold and platinum group elements.

MXR's is acquiring the mineral rights to the conglomerates underlying and adjacent to Choco Pacific's historic exploration and production.

Production figures for various areas within Choco are sourced from: R.J. Fletcher and Assoc. (2011) Review of Gold and Platinum Production in Choco Province Colombia Part 3.
Private Report for Condoto Platinum Ltd.

Map Key

- Choco Mineral Applications
- Novita Mineral Applications
- Communities
- Copper (1)
- Historic Gold Mine (64)
- Historic Platinum Mine (4)
- Roads
- 500m drill holes with conglomerates
- 63 g/t Gold over 9.8m
- MXR Novita Exploration Camp
- Novita Vieja - Historic 1oz/ton prospects
- Novita Higher Community Council Boundary (Novita Agreement)
